

Why connect?

A healthier home
in your backyard
and beyond.

A better service
with no major
maintenance issues.

More flexibility
to change your home
to suit your lifestyle.

A better place to live
by switching from septic
backyards to safe ones.

Peninsula ECO is connected

The Peninsula ECO Sewerage Project

Peninsula ECO is the new sewer system now installed along the southern Mornington Peninsula.

It will replace septic tank systems and treatment plants on about 16,500 properties. Many of these are leaking waste containing bacteria and chemicals into the environment. Peninsula ECO fixes this problem forever.

You can now connect your home and help keep the peninsula beautiful for us all and for generations to come.
